WORK EXPERIENCE

Deloitte LLP <i>Senior Consultant, Global Transfer Pricing & Econometric Research</i>	New York, NY Jun. 2021 – Present
- Provided pricing services of cross border transactions—including intercompany loan, cash pooling, FX trades, factoring, and IP valuation—to multinational corporations in asset management, hedge funds and banking sectors. - Performed 120+ economic benchmarks for interest rate, debt capacity, cash flows using proprietary quantitative models. Analyzed industry dynamics and peer financials. Optimized intercompany flows and restructuring. - Managed operational aspects of intercompany financing transactions such as loans, cash pooling, FX swaps, and repo structures. Ensured compliance and optimizing liquidity across global entities. - Applied econometric modeling techniques (panel data with random effects) to evaluate macroeconomic variables impacts on intercompany pricing structures and corporate profitability. - Automated pricing workflows using Python and SQL. Recued manual processing time and improved a project operating margin from ~48% to ~91%.	
<i>Firm Initiatives Work, Model Risk, AI & Data, GenAI Office (~430 hours)</i>	May 2023 – Oct 2025
- Developed a liquidity resilience tabletop exercise for a public pension fund. Contributed to stress scenario design and risk mapping. Evaluated crisis response across time horizons. Assessed asset conversion under adverse conditions. - Validated loan pricing and funds transfer pricing for a national bank. Assessed data quality, model assumptions, and performance through independent replication, benchmarking, and integration of tariff-driven risk factors. - Contributed to the development of executive-level dashboards for the life science industry. Utilized Tableau to visualize performance metrics and key insights on different segments from collected survey data. - Acted as firmwide GenAI ambassador, supported internal GenAI tool design, deployment, and enhancement.	

RESEARCH EXPERIENCE

Quantitative Research & Systematic Trading: A Transfer Pricing-Inspired Approach <i>Research Paper, advised by John Wells, former Deloitte US Transfer Pricing leader</i>	New York, NY Aug. 2025 – Exp. Feb. 2026
Leveraged transfer pricing principles to innovate systematic trading strategies across options, crypto, and FX using machine learning and market microstructure analytics.	
The Real U.S.-China Trade Fight Isn't About Exports <i>Article published in Barron's (June 2025)(link)</i> <i>Research Assistant of Marc Chandler, Chief Market Strategist, Bannockburn Global Forex</i>	New York, NY Jun. 2025
Applied research on transfer pricing and multinational tax structures. Integrated qualitative insights on intra-firm flows and macroeconomic policy to shape narrative and editorial direction.	

LEADERSHIP EXPERIENCE

Deloitte GreenDot Basketball Club <i>Co-Leader</i>	New York, NY Dec. 2023 – Oct. 2024
Managed finances, operations, and monthly basketball run-ups of a 150+ member club.
